Optical Aluminum Coating

- High reflectivity
- ☑ Increasing reflectors performance
- \blacksquare Esthetic and economical metal finishing

- Automotive & Truck parts
- Outdoor & indoor lighting systems

TECHNICAL CHARACTERISTICS

Physical Vapor Deposition (PVD) process by evaporation:

- Good grip on plastic
- Limited cost using recent and performant equipments

SPECIFICATIONS

Specifications related to the standards required by car manufacturers and lighting

☑ 90% reflectivity

Performance	ormance Spectrometer with integrant sphere Specular reflectivity 90%						
Aging	DIN EN ISO 6270-2D47 1165Climatic test from 3 to 5 days under controlled humidity and temperatureThermal shock cycle: alternation hot / cold and humidity for several days		<u>Valeo Method</u> Storage cycle: long period of high temperature, then low				
Holding	<u>ASTM – D3359</u> Adhesion: claw / scotch		Renault Method Immersion: 48h in basic solution
